PROFESSIONAL SUMMARY

Results-driven Full-Stack Software & Web Developer with expertise in building responsive React applications, scalable Node.js/Python microservices, and high-performance RESTful APIs. Experienced in state management, real-time WebSockets, Redis caching, and relational/NoSQL database design. Passionate about writing clean, maintainable code and creating intuitive user experiences.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit
Backend:	Node.js, Express.js, Python, FastAPI, RESTful APIs, WebSockets, JWT Authentication, Microservices
Databases:	PostgreSQL, MongoDB, Redis (Caching & Session Store), MySQL
DevOps & Tools:	Git, GitHub, Docker, Postman, Linux / Bash, CI/CD Actions, Vite

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer — *TechNova Solutions* | 2023 – Present

- Architected responsive client-facing web applications using React 18, Tailwind CSS, and Node.js.
- Engineered secure RESTful APIs with Express and PostgreSQL, processing 25,000+ daily requests with sub-100ms response times.
- Implemented Redis caching layers for catalog data, reducing primary database load by 42%.
- Configured automated CI/CD deployment pipelines using GitHub Actions and containerized services using Docker.

Software Developer Intern — *Apex Digital Labs* | 2022 – 2023

- Developed modular React UI component libraries with accessible keyboard navigation and state management.
- Migrated legacy endpoints into modern Python FastAPI asynchronous microservices, improving throughput by 30%.
- Authored unit and automated integration tests using Jest and Pytest, boosting overall test coverage to 85%.

FEATURED PROJECTS

CloudSync — Real-Time Collaborative Workspace (React, Node.js, Socket.io, PostgreSQL)

- Developed a collaborative document platform supporting multi-user concurrent edits with conflict-free replication.
- Integrated WebSockets for sub-50ms sync and implemented JWT authentication with role-based access control.

ShopSphere — Distributed E-Commerce Backend (Python, FastAPI, Redis, Docker, MongoDB)

- Designed high-throughput ordering service with Redis distributed locking to prevent inventory race conditions during flash sales.
- Implemented automated OpenAPI documentation and containerized the multi-service setup with Docker Compose.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering
Savitribai Phule Pune University (SPPU) | CGPA: 8.8 / 10.0 | Graduated 2024
